

## Download MedCalc Version 20.216

This is the full-featured MedCalc program. You can use it, without any feature limitations, during 15 days without registration.

After this trial period you should [purchase a MedCalc license](#) so you can continue to use the software.

MedCalc is available in different versions for 32-bits and 64-bits Windows editions. The 32-bits version will work on both Windows editions. The 64-bits version will work on 64-bits Windows editions only. **But if you are experiencing problems with the 64-bits version, you should use the 32-bits version (both have the same functionality).**

MedCalc setup file 64-bits (26.85 MB)	<a href="#">Download</a>

Problems with downloading? See our [Alternative download sites](#).

### Download and installation instructions

- The MedCalc installation files are suitable for new installations only as well as software updates.
- If you have previously installed MedCalc, you must close any open (running) copy of MedCalc first. Then execute **medcalcsetup[32/64].msi** and follow the instructions for the installation procedure.
- If you want to install the 64-bits version and you have a 32-bits MedCalc version already installed, you should first remove that older MedCalc version through your Windows control panel.
- [How to determine whether a computer is running a 32-bit version or 64-bit version of the Windows operating system](#) (link to Microsoft website).
- Anti-virus programs can sometimes interfere with the MedCalc installation process. Temporarily disabling your anti-virus program may help if you're having trouble with your installation. You should re-enable it as soon as installation has been completed.
- [Network license installation](#).

### Sample files

When you run the software for the first time, several MedCalc sample data files will be copied into your documents folder, typically into

Documents\MedCalc\Sample files

When you upgrade the software, the sample data files may be overwritten by new versions of these files.

### Free MedCalc file viewer

With the free MedCalc file viewer you can open MedCalc files (\*.mc1) without the need for a MedCalc license. This file viewer has limited capabilities and will not allow to perform new statistical analyses or create new graphs.
